Office Action

Rejections Under 35 U.S.C. § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

Claim 10 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim is directed to a generic electromagnetic waveform which occurs naturally.

Rejections Under 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 10 is rejected under 35 U.S.C. § 102(b) as being clearly anticipated by any electromagnetic waveform.

Claim 10 is a product-by-process claim, a product; the waveform produced by the process; the method of claim 1. As such the process does not limit the product claimed. The claim is limited to the structure of the waveform and as the claim includes no structure the waveform is anticipated by any electromagnetic waveform.

Reasons for Allowability

Claims 1-9, and 11-20 are allowed in view of the prior art of record.

The prior art of record fails to teach a probe method including downconverting a beam, converging two portions of the beam, interacting a portion of the beam with the sample, and combining the beam with the reference beam as found in claim 1. The prior art fails to teach a probe apparatus including the multi-refrangent device, a condenser, a probe beam, and the beam-splitter of claim 12.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samuel A. Turner whose telephone number is (703) 308-4803. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank G. Font, can be reached on (703) 308-4881.

The fax phone number for this Group is (703) 308-7722. The faxing of papers related to this application must conform with the notice published in the Official Gazette, 1096 O.G. 30 (15 November 1989). The Group receptionist telephone number is (703) 308-0956.

Any inquiry of a technical nature regarding reissues, petitions, and terminal disclaimers should be directed to Ed Glick whose telephone number is (703) 308-4858, Hien Phan whose telephone number is (703) 308-7502, or Ed Westin whose telephone number is (703) 308-4823.

Any other inquiry of a technical nature, and all inquiries of a general nature including those relating to the status of this application or any patent term adjustment should be directed to TC2800 Customer Service Office whose telephone number is (703) 306-3329.
